

Investment Objective

To maximise long-term returns for this risk strategy, achieving a minimum of CPI + 6% over a 3 year rolling basis. Optimal asset allocation is determined using sophisticated loss aversion statistical modelling.

Asset Class Allocation

Risk Profile

Risk	Low	Low-Mod	Mod	Mod-High	High
Term	1-3 years	3+ years	3-5 years	5+ years	7+ years

- Where the asset allocation contained in this MDD reflects offshore and equity exposure, the portfolio is exposed to currency and equity risks.
- The portfolio is exposed to default and interest rate risks.
- Therefore, it is suitable for medium term investment horizons.
- The expected potential long-term investment returns are lower but less volatile over the medium to long term than higher risk portfolios.

Investment Options - SWIP Managed Segregated Portfolios

Information & Disclosures

Risks: Certain investments - including those involving futures, options, equity swaps, and other derivatives may give rise to substantial risk and might not be suitable for all investors. Where foreign securities are included in the portfolio there may be additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. **Fees:** Includes our portfolio management fee, foreign exchange cost, third-party costs, and other transaction costs on a reasonable best estimate basis, as well as costs which are implicit within the underlying instruments in which we invest. The fees are based on the most recent historical total expense ratios and transaction costs on the underlying holdings within the portfolio. It is assumed that the holdings of the portfolios and their related cost will remain unchanged but will be updated on a quarterly basis. **Portfolio performance:** The reported strategy return includes a theoretical component calculation for the period from January 2015 to May 2016. Performance is based on the standard portfolio including physical offshore exposure. Clients invested in the limited portfolio or holding local ETF's instead of offshore ETF's may experience different performance returns.
